This document provides information for ordering customized PDF pay reports derived from the CompFacts Pay Database. It contains summary information on the database and available report types and customization options, lists and codes of selectable jobs, locations and industries, illustrative report content and a faxable form to place your order. Please call Bob Lerner at 888-512-1200 Ext 702 with any questions or to discuss pre-loading your report data into our pay analysis application (Pay Integrator), expanded output for multi-location or multi-industry organizations, or any special needs.

Nature of the Database

The database covers base pay and is derived from public (government) pay surveys which we enhance in a variety of ways. These surveys reflect statistically-adequate sample sizes and use consistent and well-tested mathematical, computer and compensation techniques overseen by professional pay analysts, statisticians and economists. The database covers 1.2 million organizations, 800 jobs, 442 industry classifications, 52 states and 409 metropolitan areas.

Content of Reports

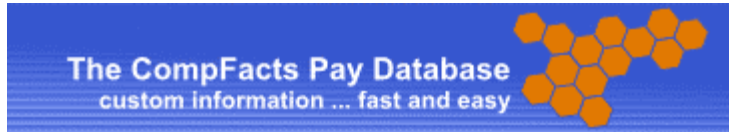

Reports are normally provided in PDF format and include summary job descriptions and (where available and statistically meaningful) each job’s number of employees, 10th, 25th, median, mean, 75th and 90th percentiles and percent pay change over the prior year. In addition, any two market percentiles (1st through 99th) are provided. Market data are aged to the date and at the compound annual growth rate the recipient specifies. Data cuts reflect the states/metropolitan areas (as well as total U.S.) and industries specified by the recipient.

Available Reports

There are currently two standard reports available – the **Basic Report** and the **Six Labor Pools Report**.

The Basic Report allows the recipient to specify any number and variety of jobs, locations and industries (as well as whether results are presented by job within data cut or data cut within job), with the following type result:

(Data Aged to 12/31/2007 at an Annual Compound Growth Rate of 3.2 Percent)									
Prepared for the internal use only by Jones Services, Inc.									
#Ees	Ptl 35	Ptl 65	Ptl 10	Ptl 25	Mean	% Yr Chg	Median	Ptl 75	Ptl 90
[43-4051] Customer service representatives									
Data Cut: Furniture and Related Product Manufacturing									
7,320	28,247	37,155	21,644	25,691	32,761	2.1	31,096	38,079	46,890

The **Six Labor Pools Report** allows the recipient to specify a target industry and two target locations (with either or both being a state or metropolitan area). The report, as shown below, provides pay data on hundreds of common jobs for six labor pools:

1. The target industry at the first location (e.g. a city)
2. All industries combined at the first location (e.g. a city)
3. The target industry at the second location (e.g. a state)
4. All industries combined at the second location (e.g. a state)
5. The target industry for all of the United States
6. All industries combined for all of the United States

Thus, pay data are provided for labor pools considered to be local (e.g. a city), regional (e.g. a single state or two adjacent states), or national, and considered industry-specific or not industry-specific.

Related Options

In addition to the two PDF reports just described, data can be provided in a variety of tailored ways to meet special requirements. For example:

- Our pay data (plus your own internal pay data and, if available, other pay survey data) can be loaded into our pay analysis application (Pay Integrator) for a total solution. Information on Pay Integrator, including a webcast, is available at our website.
- If your organization needs pay data on a great many locations or industries, we can design a special output to meet your needs quickly and affordably.

Fax Number: 1- 888- 512-1200

Please fax this form to the above number. We will contact you if needed, or email an invoice to the provided address. If acceptable, pay the invoice and your report will be emailed to you within a business day or two.

Your name, organization, title, mailing address, telephone and email	
Type report (Basic or Six Labor Pools).	
Desired market aging date and annual compound growth rate, and two custom percentiles (1 to 99)	
Codes of desired industries (any number for the Basic report, one for the Six Labor Pools Report). This will include organizations at all locations.	
Codes of desired locations (any number for the Basic Report, two for the Six Labor Pools Report). This will include organizations in all industries.	
For the Basic Report, codes for any combination “specific industry at specific location” data cuts. Show each combination as a location code, followed by a “+” sign, followed by the industry code.	
For the Basic Report, codes of desired job groups	
For the Basic Report, do you want the “All Organizations” data cut, average values computed for all data cuts (except “All Organizations”) for each job, and/or the free version of Pay Integrator to analyze the market data against your internal pay data? Please provide three responses.	
For the Basic Report, do you want data displayed as option 1 (sorted by data cut within job) or as option 2 (sorted by job within data cut)? If average values are computed for all data cuts, only option 1 is available.	
For the Six Labor Pools Report, should jobs not considered applicable to the selected industry and locations be omitted?

Selected Jobs Covered in Related Report

17-2061 Computer hardware engineers

Research, design, develop, and test computer or computer-related equipment for commercial, industrial, military, or scientific use. May supervise the manufacturing and installation of computer or computer-related equipment and components. Exclude "Computer Software Engineers, Applications" (15-1031) and "Computer Software Engineers, Systems Software" (15-1032).

43-9011 Computer operators

Monitor and control electronic computer and peripheral electronic data processing equipment to process business, scientific, engineering, and other data according to operating instructions. May enter commands at a computer terminal and set controls on computer and peripheral devices. Monitor and respond to operating and error messages. Exclude "Data Entry Keyers" (43-9021).

15-1021 Computer programmers

Convert project specifications and statements of problems and procedures to detailed logical flow charts for coding into computer language. Develop and write computer programs to store, locate, and retrieve specific documents, data, and information. May program web sites.

25-1021 Computer science teachers, postsecondary

Teach courses in computer science. May specialize in a field of computer science, such as the design and function of computers or operations and research analysis. Include both teachers primarily engaged in teaching and those who do a combination of both teaching and research.

15-1031 Computer software engineers, applications

Develop, create, and modify general computer applications software or specialized utility programs. Analyze user needs and develop software solutions. Design software or customize software for client use with the aim of optimizing operational efficiency. May analyze and design databases within an application area, working individually or coordinating database development as part of a team. Exclude "Computer Hardware Engineers" (17-2061).

15-1032 Computer software engineers, systems software

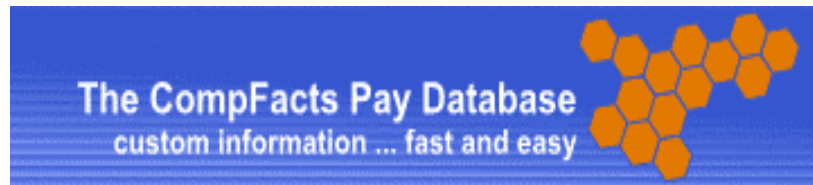

Research, design, develop, and test operating systems-level software, compilers, and network distribution software for medical, industrial, military, communications, aerospace, business, scientific, and general computing applications. Set operational specifications and formulate and analyze software requirements. Apply principles and techniques of computer science, engineering, and mathematical analysis.

15-1041 Computer support specialists

Provide technical assistance to computer system users. Answer questions or resolve computer problems for clients in person, via telephone or from remote location. May provide assistance concerning the use of computer hardware and software, including printing, installation, word processing, electronic mail, and operating systems. Exclude "Network and Computer Systems Administrators" (15-1071).

15-1051 Computer systems analysts

Analyze science, engineering, business, and all other data processing problems for application to electronic data processing systems. Analyze user requirements, procedures, and problems to automate or improve existing systems and review computer system capabilities, workflow, and scheduling limitations. May analyze or recommend commercially available software. Exclude persons working primarily as "Engineers" (17-2011 through 17-2199), "Mathematicians" (15-2021), or "Scientists" (19-1011 through 19-3099). May supervise computer programmers.
